CAREER OBJECTIVE

MCA student with strong foundations in cyber security, network monitoring, intrusion detection, and system analysis. Hands-on experience in building real-time security systems, anomaly detection engines, and threat visualization dashboards. Passionate about defensive security, SOC operations, intrusion detection, and ethical hacking, seeking an entry-level Cyber Security / SOC Analyst / Security Engineer role to protect

EDUCATION

Master of Computer Application (MCA) | RV Institute Of Technology And Management-Bengaluru, VTU (Pursuing) 2025-2026 | Marks secured:71%

Bachelor of Computer Applications (BCA) | MGM Degree College –Kushal nagar, Mangalore University 2021 – 2024 | Marks secured:72%

Pre-University (PCMC - Computer Science) Sri Rama PU College –Mangalore, KSEEB 2020 – 2021 | Marks secured: 64.33%

SKILLS

- Network Security & Traffic Analysis
- Intrusion Detection & Anomaly Detection
- Threat Analysis & Risk Identification
- Incident Monitoring & Alerting
- Secure System Design
- Log Analysis & Pattern Detection
- Defensive Security (Blue Team mindset)
- Strong analytical & logical reasoning

TOOLS & TECHNOLOGIES

- Intrusion Detection Systems (IDS concepts)
- Network Packet Analysis (foundational)
- VPN Security Concepts
- Attack Pattern Visualization
- Threat Analytics Dashboards

PROJECTS

- InnerOS – Emotional Companion App

  AI-powered mood detection system using text-based emotion analysis.

  Integrated TensorFlow.js for real-time mood prediction and visualization.

  Provided therapy suggestions, affirmations, and chat-based emotional support.

- Sentinel AI – Intelligent Intrusion Detection System

  Developed a smart VPN security tool with real-time network anomaly detection.

  Used AI models to identify malicious packets and visualize attack patterns.

  Implemented secure dashboard with live alerts and analytics using Chart.js.

- Car Showroom Management System

  Built a full-stack system to manage car inventory, customers, and sales records.

  Enabled secure login, search, and invoice generation for efficient operations.

  .Improved data management and workflow automation using database integration.
